DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-9 are rejected under 35 U.S.C. 102(b) as anticipated by Villa-Real (U.S. Patent 4,320,767). Villa-Real teaches the claimed invention as follows: the digital pressure gauge (21) comprising a pressure sensor adapted for sensing blood pressure of a user and generating signals corresponding to pressures (Column 33, Lines 59-68 and Column 34, Lines 1-11), the control unit having an input connected to the pressure sensor for establishing values of pressure from the pressure sensor signals, said control unit maintaining a count of a number of operations of the gauge and operational duration (microcomputer, Figures 17-19) said control unit generating a warning message (Block 124) and an activation signal (15), the warning unit coupled to control unit (Block 124), the display unit coupled to the control unit (Figures 17,18, and 19), the warning signal selected from a group of audio signal (20) and/or light signal (8), the predetermined threshold value is set during manufacture and/or the predetermined threshold value set by user (Column 5, Lines 62-68, Column 6, Lines 1-3, and references made throughout prior art), the power supply (23, 24, 25) coupled to pressure sensor, the control unit, the warning unit and the display unit (Figures

17,18,19), and the input button unit coupled to the control unit for operationally activating the pressure gauge (9).

Response to Arguments

2. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marissa L Ferguson whose telephone number is 703-305-3194. The examiner can normally be reached on (M-F) 7:30am-4:00pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Benjamin R Fuller can be reached on 703-308-0079.
